

Cordall Hail Net Adjusta Clip

The ideal solution for holding and adjusting protective hail net over fruit trees vulnerable to hail damage. Used with a bungee system to provide ultimate tension and straightforward adjustment.

The new Cordall Hail Net Adjusta Clip can be placed anywhere in the netting. The two-piece design ensures placement is not restricted to net edges. The cleat allows bungee tension to be easily adjusted to suit variability within blocks and that caused by wind shifts.

Made with UV treated Nylon 6 the clip is designed to withstand long sunshine hours

For a longer lasting solution use with Solcor Solid Core bungee. Manufactured in New Zealand for horticultural use, Solcor bungee has a solid rubber core with a UV treated polyester cover to ensure resistance to weather conditions and general wear.

Designed in New Zealand

Specifications

Size: 58mm x 65mm x 28mm (when both halves are clipped together)

Weight: 19.1 grams (both halves)

Construction

Material: Glass-filled nylon reinforced ABS Plastic. UV Resistant
